

Shahzaib Shafique

Full Stack AI Engineer | AI Agents, LLM Apps, RAG, Automation
Islamabad, Pakistan | shahzaibshafique.dev@gmail.com | 0311-9762568

GitHub: github.com/Shahzaib30 | LinkedIn: linkedin.com/in/s-shahzaib | Portfolio: shahzaib30.github.io

Professional Summary

Full Stack AI Engineer building RAG pipelines, LLM fine-tuning, multi-agent systems, AI automation, and SaaS platforms. Deployed live products including instacann.com (Stripe subscriptions, geospatial search) and a multi-channel AI support agent with hybrid RAG and human handoff. Upwork Top Rated: 100% Job Success, 5.0 rating (17 reviews), 27 completed jobs.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, Bash

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, PyTorch, MONAI, scikit-learn, Hugging Face, OpenCV, Transformers

LLM and RAG: LoRA, QLoRA, PEFT, LangChain, LangGraph, LangSmith, FAISS, BM25, ChromaDB, Reranking, Embeddings, Prompt Engineering, OpenAI API, DeepSeek API, Ollama

Agentic AI and Automation: Multi-Agent Systems, Human-in-the-Loop, n8n, Webhooks, Slack/Discord/WhatsApp/Telegram APIs

Full Stack and DevOps: FastAPI, Next.js, React, Tailwind CSS, Three.js, PostgreSQL, PostGIS, Redis, Docker, Nginx, DigitalOcean, Prometheus, Grafana, Stripe, Clerk

Experience

AI Engineer Intern, Wise-Tech (On-site) 2026 · 3 Months

- Built NLP classification and extraction pipelines with Hugging Face Transformers and FastAPI in production; cut LLM response latency 30% via prompt engineering and quantization.

Freelance Full Stack Developer, Upwork Top Rated (Remote) Jan 2022 to Present

- Completed 27 Upwork projects for international clients at 100% Job Success: web apps, REST APIs, AI chatbots, WordPress builds, and SEO (React, Next.js, FastAPI, PostgreSQL).

Data Science Intern, Digital Empowerment Network (Remote) Sep 2025

- EDA on 10,000+ record datasets with Python, Pandas, NumPy; trained and evaluated ML classification models.

Projects

AI Customer Support Agent with Hybrid RAG and Human Handoff 2026

FastAPI, FAISS, BM25, DeepSeek, Redis, PostgreSQL, n8n, Next.js, Prometheus, Grafana, Docker | github.com/Shahzaib30/ai-support-agent

- Built a channel-agnostic support agent (web, Discord, WhatsApp, Telegram connectors) with hybrid RAG (FAISS + BM25, RRF fusion, cross-encoder reranking), Redis caching, and PostgreSQL conversation memory.
- Implemented sentiment, keyword, and low-confidence escalation to Slack with a human-handoff state machine, 5-minute auto-resume, webhook deduplication, Prometheus/Grafana monitoring, and an 8-service Docker Compose stack.

InstaCann: Full Stack Directory SaaS (Client Project, Live) 2026

FastAPI, Next.js 14, PostgreSQL, PostGIS, Redis, Stripe, Clerk, Docker, DigitalOcean | instacann.com

- Built, deployed, and manage a production SaaS platform with 30+ API endpoints and 8 Docker containers on DigitalOcean with Nginx and SSL, covering 50 US states, 15,000+ cities, and 40,700+ ZIP codes; handled technical SEO, with all pages indexed and organic users arriving.
- Engineered multi-tier Stripe subscriptions, PostGIS geospatial search, Clerk JWT role-based access (user, owner, admin), owner/admin dashboards, review moderation, and Leaflet maps.

QLoRA Fine-tuned LLM with Hybrid RAG 2026

Python, QLoRA, PEFT, Hugging Face, LangChain, ChromaDB, RAGAS, FastAPI | github.com/Shahzaib30/QLoRa-Rag-Chatbot

- Fine-tuned Mistral-7B-Instruct with 4-bit QLoRA on 100k doctor-patient conversations; benchmarked base, fine-tuned, and fine-tuned + hybrid RAG on ROUGE-L, BERTScore, and RAGAS, with hybrid scoring highest.

TAVI-Net: 3D Cardiac CT Segmentation and Planning Sep 2025 to Jun 2026

PyTorch, MONAI, FastAPI, React, Three.js, Ollama, Docker | github.com/Shahzaib30/tavi-planning-system

- Trained a MONAI 3D U-Net on 378 CT scans (public TAVRP-PL dataset) to segment five cardiac structures, mean Dice 0.85 on 100 held-out test scans; built FastAPI inference, annulus measurements, a React Three Fiber 3D viewer, and a local-LLM review step.

MADE: Multi-Agent Decision Engine 2026

LangGraph, LangSmith, FastAPI, Next.js, Redis, ChromaDB, PostgreSQL | github.com/Shahzaib30/Multi-Agent-Decision-Engine

- Built a 5-agent system (Research, Reasoning, Critic, Risk, Synthesizer) on LangGraph with a custom consensus engine, confidence-weighted voting, three-tier memory, human-in-the-loop Slack gating, and OpenTelemetry observability.

Advanced RAG Assistant 2026

LangGraph, LangChain, FastAPI, Next.js, ChromaDB, PostgreSQL, Ollama | github.com/Shahzaib30/advanced-rag-assistant

- Built a RAG support chatbot with streamed responses, document upload (TXT, MD, PDF), lead capture, transcripts, and a protected admin dashboard (LangGraph routing, ChromaDB).

Education

BS in Artificial Intelligence — NUML, Islamabad Graduated May 2026

GPA: 3.4 / 4.0 Coursework: Machine Learning, Deep Learning, Computer Vision, NLP, Reinforcement Learning
