PROFESSIONAL SUMMARY

AI Engineer and Agentic AI Developer specializing in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and autonomous multi-agent workflows. Transitioning a strong foundation as a Top-Rated Upwork freelancer into building production-ready business AI applications. Passionate Linux user with hands-on experience deploying stateful chatbots, integrating local and cloud-based LLMs, and building robust backend systems.

SKILLS

Technical Skills

Languages & Frameworks: Python, C++ , JavaScript, SQL, FastAPI, Next.js, React, RESTful APIs, Node.js

AI & Machine Learning: LangGraph, LangChain, Agentic AI, Advanced RAG Pipelines, Multi-Agent Coordination, Fine-tuning, Embeddings, PyTorch, Hugging Face, Transformers, Automated Database Optimization

Tools & Infrastructure: Arch Linux, Docker, Git, PostgreSQL, PgVector, FAISS, Pinecone, Local Deployments (Ollama)

EXPERIENCE

Freelance AI Engineer & Web Developer

2022 – Present

Upwork (Top Rated)

Remote

- Engineered custom software workflows and deployed production-grade Generative AI integrations for global clients.
- Maintained a 100% Job Success Score by consistently delivering high-quality web structures and automated modules.

Data Science Intern

1 Month

Digital Empowerment Network

Remote

- Worked on various Machine Learning models and performed Exploratory Data Analysis (EDA).

PROJECTS

Enterprise RAG System & Lead-Generation AI Agent

2026

FastAPI, LangGraph, PostgreSQL, React, Vanilla JS

- Architected an autonomous backend engine with secure data storage pipelines and token validation security gates.
- Engineered a secure, data-rich Admin Dashboard displaying real-time analytics, user lead tables, and conversation.
- Developed a portable, cross-platform chat widget that embeds instantly into any React or WordPress site via a single line.

TAVI Planning System

2025

Deep Learning, nnUNet, 3D Segmentation

- Model that analyzes medical heart scans to detect disease and measure valve size (85%+ accuracy).
- Built 3D visualization for valve fitting inside patient anatomy.
- Integrated Hugging Face model to generate automated medical reports.

Stateful LangGraph AI Agent

2026

Python, LangGraph, PostgreSQL, Streamlit, Ollama

- Built memory-enabled AI chatbot using LangGraph with tool usage.
- Stored and retrieved conversations using PostgreSQL.
- Developed Streamlit UI with typing effect and chat history.

EDUCATION

National University of Modern Languages (NUML)

2022 – Present

BS Artificial Intelligence (7th Semester, 3.5 CGPA)

Islamabad, Pakistan

CERTIFICATES

Data Science Certification – Data analysis, ML, visualization

NLP Certification – NLP techniques and applications
