

Shahzaib Shafique

AI Engineer | Machine Learning Engineer | Agentic AI Developer

Islamabad, Pakistan | shahzaibshafique.dev@gmail.com | 0311-9762568

GitHub: github.com/Shahzaib30 | LinkedIn: [linkedin.com/in/s-shahzaib](https://www.linkedin.com/in/s-shahzaib) | Portfolio: <http://shahzaib30.github.io/>

Professional Summary

AI Engineer with experience in machine learning, deep learning, NLP, LLM fine-tuning, multi-agent systems, and production RAG pipelines. Skilled in Python, PyTorch, FastAPI, LangChain, LangGraph, Hugging Face, PEFT, Redis, and PostgreSQL. Built production systems including a multi-agent decision engine, fine-tuned LLMs, RAG chatbots, and medical image segmentation pipelines.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, C++, Bash

AI and Machine Learning: Machine Learning, Deep Learning, NLP, Computer Vision, PyTorch, scikit-learn, Hugging Face, OpenCV, Transformers

LLM and Fine-tuning: LoRA, QLoRA, PEFT, bitsandbytes, LangChain, LangGraph, LangSmith, RAG, Embeddings, Vector Search, Prompt Engineering, Ollama, OpenAI API

Agentic AI and Infrastructure: Multi-Agent Systems, Consensus Engines, Human-in-the-Loop, Redis, ChromaDB, PgVector, FAISS, OpenTelemetry

Backend and Tools: FastAPI, REST APIs, PostgreSQL, Docker, Git, Linux, React, Next.js

Experience

AI Engineer Intern

2026 (3 Months)

Wise-Tech, On-site

- Developed and deployed NLP-based text classification and information extraction pipelines using Python, Hugging Face Transformers, and FastAPI, integrated into a live production application.
- Optimized LLM inference workflows through prompt engineering and model quantization, reducing average response latency by 30 percent across core AI features.

Freelance Full Stack Developer

Jan 2022 to Present

Upwork Top Rated, Remote

- Delivered 15+ production web applications, REST APIs, and backend integrations for international clients while maintaining a 100 percent Job Success Score.
- Built and deployed full-stack systems using React, Next.js, FastAPI, PostgreSQL, and AWS, including data-driven dashboards and automated backend pipelines.

Data Science Intern

Sep 2025

Digital Empowerment Network, Remote

- Performed EDA on 10,000+ record datasets using Python, Pandas, and NumPy, and trained ML classification models evaluated on accuracy, precision, recall, and F1-score.

Projects

MADE — Multi-Agent Decision Engine

2026

LangGraph, LangSmith, FastAPI, Next.js, Redis, ChromaDB, PostgreSQL | github.com/Shahzaib30/Multi-Agent-Decision-Engine

- Architected a production-grade multi-agent system with 5 specialist agents (Research, Reasoning, Critic, Risk, Synthesizer) orchestrated via a LangGraph state machine with crash recovery, enabling automated financial analysis, competitive intelligence, and customer support workflows.
- Engineered a custom consensus engine using structured debate protocols and confidence-weighted voting, backed by three-tier memory (Redis, ChromaDB, PostgreSQL), human-in-the-loop Slack gating, and full observability via OpenTelemetry, Prometheus, and Grafana.

Enterprise RAG System and Agentic AI Workflow

Jan 2026 to Present

FastAPI, LangGraph, LangChain, PostgreSQL, PgVector, React | github.com/Shahzaib30/advanced-rag-assistant

- Built a production RAG chatbot with vector search and agentic LangGraph workflows handling 100+ weekly queries, plus a React admin dashboard and embeddable widget storing 50+ monthly leads into PostgreSQL.

QLoRA Fine-tuned LLM with RAG Hybrid Integration

2026

Python, QLoRA, PEFT, Hugging Face, LangChain, FastAPI | github.com/Shahzaib30/qlora-rag-chatbot

- Fine-tuned Mistral-7B using QLoRA with 4-bit quantization, cutting GPU memory by 75 percent, then benchmarked RAG-only, fine-tune-only, and hybrid configurations — hybrid achieved the highest domain accuracy.

TAVI Planning System

Sep 2025 to Jun 2026

Deep Learning, nnUNet, 3D Segmentation, Medical Imaging

- Trained a 3D nnUNet segmentation model on CTA scans achieving 85 percent+ Dice score, built 3D valve-fitting visualizations, and generated AI-assisted diagnostic reports for cardiac surgical planning.

Education

Bachelor of Science (BS) in Artificial Intelligence

National University of Modern Languages (NUML), Islamabad, Pakistan

Graduated: May 2026 GPA: 3.4 / 4.0 Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, NLP, Reinforcement Learning, Database Systems
